DETAILED ACTION

1. This is in response to application filed June 30, 2003. Claims 1-27 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-8 and 19-27, drawn to servers for data backup, classified in class 709, subclass 203.
 - II. Claims 9-18, drawn to replicating data based on priority, classified in class 707, subclass 200.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (I) as claimed does not require the particular of the subcombination (II) as claimed. The subcombination II has separate utility such as replicating data based on priority. Therefore, the inventions are distinct; however, they could be usable together.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, restriction for examination purposes as indicated is proper.
